Chapter 1. Updates for Linux applications - middleware

With Updates for Linux applications - middleware content site, customer can deploy updates to a vast number of third-party middleware applications.

Enabling updates for Linux applications - middleware

You can enable updates for Linux applications from BigFix console.

Complete the following steps to enable **Updates for Linux applications** from the BigFix console licence overview dashboard:

1. Click Licence Overview on the BigFix Management navigation tree.

2. Click Compliance or Lifecycle domain on the Licence Overview dashboard.

Big	Fix License Overv	iew	Last Update: 7/14/2022 12:	56:53 PM	0	C	ē
		BIGFIX MOBILE	COMPLIANCE	LIF	ECYCLE		>
T							~

3. Navigate the site list and click Enable.

ENABLE	ciscoamp
ENABLE	paloaltonetworks
ENABLE	updateslinuxappsmiddleware
ENABLE	updateswindowsappsmiddleware
ENABLE	webui-ivr

Note: The site name will be updateslinuxappsmiddleware or Updates for Linux Applications Middleware.

Gathering updates for Linux applications - middleware

Use updates for Linux applications - middleware content site to submit a gather request to the BigFix server.

Complete the following steps to gather Updates for Linux applications:

1. Click Licence Overview on the BigFix Management navigation tree.

2. Click Compliance or Lifecycle domain on the Licence Overview dashboard.

Big	Fix License Overv	view	Last Update: 7/14/2022 1	12:56:53 PM	0	C	ē
		BIGFIX MOBILE	COMPLIANCE	LIF	ECYCLE		>
							~

A list of enabled site appears.

3. Navigate the site list and click Updates for Linux Applications Middleware.

Supported applications

The topic provides a list of supported applications for Windows middleware.

The following are the supported applications by Windows middleware:

- Apache Tomcat
- MongoDB

For an updated list of supported applications and current versions, see BigFix-provided content for Operating Systems and Applications or https://forum.bigfix.com/t/content-modification-updates-for-windows-applications-middleware-published-2022-07-14/42233.

Chapter 3. Frequently asked questions

Learn the answers to frequently asked questions about updates for Linux and Windows applications - extended.

How can I get the sites?

If you are a BigFix Compliance customer and have Master Operator access, you can enable the sites from **BigFix console > Licence Overview dashboard**. You have to do this only once per BigFix Root Server, then you assign which computers are subscribed to the site once the first gather is completed.

Can I deploy this contents directly to my production servers?

You must ensure that following process is completed before deploying the contents to the production servers:

- Test the content.
- Complete backing up before patching.
- Depending on the operating system or software, you may need to stop services before patching.
- You may need to stop services on other endpoint before patching the database on a separate endpoint. BigFix server Automation can help you in this process, but it is outside of the scope of a single Fixlet.

The content from these sites can be used within a BigFix server Automation plan to automate a complex server patching scenario.

Will the middleware sites be available in BigFix WebUI Patch Policies?

No, the complexity of patching middleware does not fit within the model of BigFix WebUI Patch Policies / Autopatch.

How can I request an application to be supported?

Please add an idea to our Products Ideas Portal, which is evaluated for possible additions to HCL's content stream. Make sure to add link to the software description, payload download, and other information that you think will help the evaluators.
