Operating Systems

The Operating systems section specifies the operating systems that BigFix Platform 9.5.2 supports, organized by operating system family.

Component support

- Full
- Partial
- None

Operating system families

[AIX](#) [Linux](#) [Mac OS](#) [Solaris](#) [Windows](#)

AIX

Summary

| Operating system | Operating system minimum | Hardware | Bitness | Product minimum | Components   | Notes? |
|-------------------------|--------------------------|---------------------------|------------|-----------------|--|--------|
| AIX 6.1 | TL4 | POWER System - Big Endian | 64-Exploit | 9.5.0 | <input type="radio"/> <input checked="" type="radio"/> | No |
| AIX 7.1 | Base | POWER System - Big Endian | 64-Exploit | 9.5.0 | <input type="radio"/> <input checked="" type="radio"/> | No |
| AIX 7.2 | Base | POWER System - Big Endian | 64-Exploit | 9.5.0 | <input type="radio"/> <input checked="" type="radio"/> | No |

Linux Notes

1. Includes support for RedHat and Unbreakable Kernel.
2. kernel-2.6.32-516.el6 is the minimum prerequisite level.
3. This operating system is no longer in service. Please refer to IBM's policy on unsupported operating systems:
<https://www.ibm.com/support/customercare/sas/f/handbook/policies.html#unsupported>

Windows Notes

1. Server Core installation option is supported.
2. This operating system is no longer in service. Please refer to IBM's policy on unsupported operating systems:
<https://www.ibm.com/support/customercare/sas/f/handbook/policies.html#unsupported>

Hypervisors

The Hypervisors section specifies the hypervisors that BigFix Platform 9.5.2 support.

Component support

- Full
- Partial
- None

Installable software

Operating System Families

[AIX](#) [Linux](#) [Mac OS](#) [Solaris](#) [Windows](#)

All BigFix components are supported on virtual hardware. Any hypervisor technology specified in the IBM Virtualization Policy may be used as long as the guest OS is supported by the installed BigFix component as indicated in the OS sections of this compatibility matrix. See Supported Software tab - Virtualization Management for supported Hypervisor Agents.

AIX

Summary

| Hypervisor | Product minimum | Components   | Guest operating system restriction? | Notes? |
|--|-----------------|---|-------------------------------------|--------|
| IBM PowerVM Hypervisor (LPAR, DPAR, Micro-Partition) any supported version | 9.5.2 | <input checked="" type="radio"/> <input checked="" type="radio"/> | Yes | Yes |
| WPAR: Product installed in System Workload Partition AIX 6.1 | 9.5.2 | <input checked="" type="radio"/> <input checked="" type="radio"/> | Yes | Yes |

Notes applying to hypervisors on Windows operating systems

1. Supported via Management Extender to provide audit only patch information.

Prerequisites

The Prerequisites section specifies the capabilities that BigFix Platform 9.5.2 requires, and the prerequisite products that can be used to fulfill those capabilities.

Databases Notes

1. Ships with MS-SQL Express 2008 R2 for evaluation purposes. For Windows environments, Customer will provide full version of MS-SQL Server 2008, 2012, or 2014. For Linux environments, DB2 Workgroup Server Edition 10.5 is provided. Note: Ensure that the SQL collation of the database is not case sensitive.

Supported software

The Supported software section specifies the additional software that BigFix Platform 9.5.2 supports.

Capabilities

[Databases](#) [Identity Management](#) [LDAP Servers](#)

Web Browsers Notes

1. Browser support applies to the WebReports capability of the product. Console and Client UI are not accessed via user browser.
2. Adobe Flash Player 12 or greater needs to be installed for Internet Explorer to use many dashboards and wizards in the BES Console. It is recommended that computers running the BES Console have the latest version of Adobe Flash Player installed for Internet Explorer. - For Windows Server 2012 or later, the "Desktop Experience" must be enabled. - For Windows 7 or Windows Server 2008, the Flash player must be updated using Flash Player fixlet in Updates for Windows Applications site, or directly using Adobe site. - For Windows 8 or later, or Windows Server 2012 or later, the Flash player is a part of Windows (as "Desktop Experience") and the Flash player must be updated using Flash player fixlet in Patches for Windows site, directly using Windows Update, or using update file from Microsoft download site.

Hardware

BigFix Platform 9.5.2 requires the following hardware organized by operating system family.

Operating System Families

[Linux](#) [Windows](#)

Linux

| Hardware | Components | Requirement | Applicable operating systems |
|------------|---|-------------|--|
| Disk Space | Server <ul style="list-style-type: none">BigFix Server | | <ul style="list-style-type: none">Red Hat Enterprise Linux (RHEL) Server 6 6.10 x86-64Red Hat Enterprise Linux (RHEL) Server 6.3 x86-64Red Hat Enterprise Linux (RHEL) Server 6.4 x86-64Red Hat Enterprise Linux (RHEL) Server 6.5 x86-64Red Hat Enterprise Linux (RHEL) Server 6.6 x86-64Red Hat Enterprise Linux (RHEL) Server 6.7 x86-64Red Hat Enterprise Linux (RHEL) Server 6.8 x86-64 |

Glossary

Bitness

Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode.

31: The product or part of the product runs as a 31-bit application in a 31-bit operating environment.

32: The product or part of the product runs as a 32-bit application in a 32-bit operating environment.

64-tolerate: The product or part of the product runs as a 32-bit application in a 64-bit operating environment.

64-exploit: The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.

Co-packaged

Additional products that are included in the product package.

Co-installed

Additional products that are included in the product package and installed when the product is installed.

Deployment unit

Deployment Structure identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure.

- The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile.
- Deployment units may be further divided into deployable **components**

Desktop deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications.

Server deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications.

Agent or client deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent or client deployment

units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services.

Mobile deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.

| | |
|--|---|
| Hypervisor | A virtual machine in which a product can run on a guest operating system. |
| Limited operating system support | By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support. |
| Operating system minimum | The minimum operating system maintenance level that is required to run on the product. |
| Prerequisite minimum | The minimum maintenance level that is required for the prerequisite to work with the product. |
| Product minimum | The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software. |
| Supported software minimum | The minimum maintenance level that is required for the supported software to work with the product. |
| Long Term Support Release | A Long Term Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time. |
| Continuous Delivery Product | A Continuous Delivery Product delivers new function to clients more frequently. |
| Continuous Delivery Product - Long Term Support Release | A Continuous Delivery Product delivers new function to clients more frequently. Since frequent releases may not be suitable for all client environments, Long Term Support Releases provide a package that will be supported for a longer period of time. |
